Members News

Mr. G. D. Agarwal (483) has coins of Tibet, Bhutan, Sikkim, Nepal and India for disposal and would like to correspond with other members on these series. Sotheby’s (London) held an auction of 296 lots of Islamic coins, mainly gold, in April. Prices ranged from £18 to £3,800 per lot. They will be holding another Islamic coin sale in October.

Forthcoming meetings

The Numismatic Society of India will be holding its 66th Annual Conference under the auspices of the Department of History, University of Burdwan, Burdwan 713101, West Bengal during the first week of October 1978. For further details please contact Dr. Nisar Ahmad, Secretary of the NSI, PO. Hindu University, Varanasi 5, India. The next London meeting of the ONS will be held on Saturday October 21st at St. James’ Hall, 6 Gloucester Terrace, London W 2 and will commence at 2-30 pm.

ONS Accounts

Copies of the balance sheet are available from our Treasurer, Mr. Vic. Brown, for the price of a stamped addressed envelope (UK) or an International Reply Coupon (other countries).

In 1965 and 1966 an index was published on all articles that had appeared since volume 37 (1881)

Islamic Coins

by Ariel Berman

Catalogue of the Winter 1976 Exhibition at the L. A. Mayer Memorial Institute for Islamic Art
Paperback, pp. 155 with maps, full page and text illustrations. Published: Jerusalem 1976. Price: £ 11 - 00

The catalogue lists, in English and Hebrew, 461 coins exhibited at this institute as being “a fairly representative selection” of coins in circulation in the region of Israel from the early days of the Arab conquest in the 7th. century AD to the end of the 18th. century. The coins were drawn from the Institute’s own collection and those of the Kadman Numismatic Museum, Tel Aviv and the Israel Department of Antiquities and Museums, Jerusalem: also from several private collections, including that of the author, Ariel Berman. A short introduction outlines a few highlights of numismatic history in the area and draws attention to some of the rarer coins here published for the first time. A list of Arabic legends is provided in Arabic, Hebrew and English together with indexes of mints and names in Arabic and English and an alphabetic concordance between Hebrew and Arabic letters and Romanisation used in the text. The catalogue also includes a chronological chart of the Islamic dynasties represented and a short bibliography.
Useful though this background material is, the book will be bought primarily for its descriptive listing of coins and this is where its main weakness is apparent, for those wishing to use it as a survey of the coinage rather than as a guide to coins on display. This lies in the fact that the legends are not given in full, or indeed at all in Arabic, but are described as, for example “in centre, the name of Al-Nasir” instead of listing the titles and iqābāds found on the coin. To a great extent, this deficiency is fortunately made good by careful referencing to the main published collections and by the extensive and excellent photographs both natural size and enlarged, with which the book abounds.

The coins are grouped under the usual dynastic headings, beginning with Arab-Byzantine coppers, under the slightly misleading heading of “Orthodox Caliphs” and concluding with 122 Ottoman coins up to the end of Mahmud II’s reign. For each coin, the rulers and caliph shown are named, together with the date and mint of issue where these are known. The metal, diameter and weight are given together with a description of the coin type, a translation of some or all of the legend and a reference, where appropriate, to one of the publications listed in the bibliography. Some of the dates have presumably been derived from die links with other coins where the illustrated specimen, e.g. no. 195, clearly does not show the full date assigned in the description. Both Hijri and Christian dates are shown for rulers and Caliphs and this is a useful feature for readers whose historical chronology is based on events in the western world. The value of applying the same practice to the coins themselves is less obvious as they are normally dated to a particular year in the Hijri.

It is not clear whether, for example the equation of 624 H with 1226 AD for coin no. 194 implies some evidence that it was struck during the 10 days by which these years overlapped or whether this is just an unusual approximation. A particular delight for the reviewer was the juxtaposition of coins of different dynasties struck in the same area. This makes it possible in one book to follow particular mints through the centuries; the coins for Damascus for example being covered from the facing bust Arab-Byzantine type up to Ottoman pieces of Murad IV struck over 900 years later.

It is interesting to see that coins considered by the author to have circulated in the area include not only the Arab-Sassanian drachms which have been found in hoards associated with post-reform Umayyad silver, but also the half drachms of Tabaristan struck some 50 years later to a weight standard which must by then have been obsolete in Eastern Mediterranean countries. One wonders also at the reasons for following Perz in attributing anonymous coin no. 340 to the first Ottoman ruler 'Uthman, when Artuk has published a very closely similar piece of Ishaq of the Sarukhans who reigned some 50 years after 'Uthman. But these are minor matters and any book that sets out to follow particular mints through the centuries; the coins for Damascus for example being covered from the facing bust Arab-Byzantine type up to Ottoman pieces of Murad IV struck over 900 years later.

Coins of the Sindhias

by Jan Lingen and Kenneth Wiggins

108 pages, one map, fully illustrated by line drawings; card covers. Price £ 12 - 50
Available from B. A. Seaby Ltd., 11 Margaret Street , London W. 1

An outstanding book on the coinage struck in the Indian Native States. Many hundreds of coins struck by the Sindhias who ruled the Indian State of Gwalior have been catalogued by Jan Lingen and Kenneth Wiggins, two of the foremost European scholars in the field of Indian Native States’ coinage. The various coin issues are clearly set out in tabular form, with detailed drawings of the designs and the various symbols that help to distinguish the many issues.

This is the first detailed description of coinage struck in Gwalior State and many of the issues have never been published before. The coins are arranged according to mints, of which over twenty are defined, and each section of the catalogue is prefaced by a discussion of the history of the mint and of its coinage. Much of the material in the various historical introductions has been gleaned from documents in contemporary archives and in the annual reports of administrative departments; documents not readily accessible. The authors have amassed a large body of material and organised it into a work of reference that is both detailed and very easy to read.

Review reproduced by kind permission of Frank Purvey
Two Nazr coins of the Cis-Sutlej States

by Kenneth Wiggins

1. AR Rupee: diameter 32 mm., weight 11.5 grammes
Obverse: 
Hukm shad az qadir bichum bi Ahmad bad Shah
Halk shad az qadir bichum bi Ahmad bad Shah

Reversed: 
Sicca zad bar seem wazir az owj mahi tabah mah

Some of the coins of the Cis-Sutlej states are difficult to attribute with accuracy, for the majority of them bear on the obverse the archaic distich of Ahmad Shah Durrani and they do not have any indication of their true date or of their place of minting. According to Temple the coins struck in the States of Maler Kotla, Nabha, Jhind and Patiala all bear the mint name Sirhind and are dated to the fourth regnal year of Ahmad Shah; the year in which he first struck coins at this city. These features were perpetuated on coins struck thereafter by the Cis-Sutlej chiefs until the early 20th. century. The only features which distinguish these various coins from each other are the subsidiary marks placed on them. These marks are said to be the symbols, or emblems, of the various chiefs of the states.

The coin illustrated here is a finely struck piece on a wide flan which seems to have been intended as a nazr coin. It has been assigned to Nabha State for several reasons:
1. It does not bear any marks peculiar to the coins of the other Cis-Sutlej States
2. According to Temple only the coins of Nabha bear their dates in the Samvat era
3. This piece compares well with a dump rupee of the same date illustrated by Temple (Plate II, no. 40). Temple’s coin is assigned to Jaspwant Singh (AD 1783 - 1840). The Samvat date 1893 (= AD 1836) confirms this chronology, but I have been unable to trace any particular event in that year which would have called for the issue of a nazr rupee.

R. C. Temple, The coins of the Modern Native Chiefs of the Panjab, Indian Antiquary, November 1889.

2. AR Double Rupee: diameter 33 mm., weight 23.65 grammes
Obverse: 
The usual distich of Ahmad Shah Durrani
Additionally the words - Zarb Sarhind - each side

Reverse: Centre: 
Ahmad Ali Khan
Jalus 4 Nawab
Bahadur

Around: 
Zad bar sicca daulat al faizal
rab karim bihukm walli Maler
Kotla bar seem sanah 1326

This double rupee was probably struck on the accession of Nawab Ahmad Ali Khan as ruler of Maler Kotla. He was formally installed and invested with ruling powers by the Lieutenant Governor of the Punjab on the 5th. January 1909 after succeeding on the 23rd. August 1908: both events falling in the Hegira year 1326.

I am indebted to two ONS members, C. K. Panish and Jan Lingen, for their helpful comments on these two coins.
